

# Installing a TV above an ethanol fireplace\*

When positioning an ethanol fireplace in combination with a TV screen\*\* there's a few things to keep in mind.

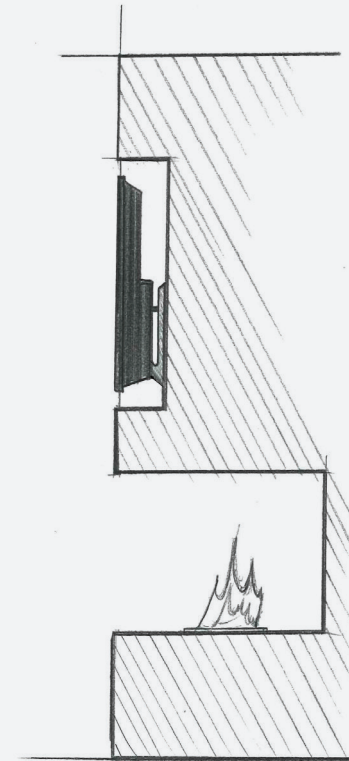

Here are three possible solutions.

\*\*Always check the specifications of the AV equipment being used to confirm suitability.

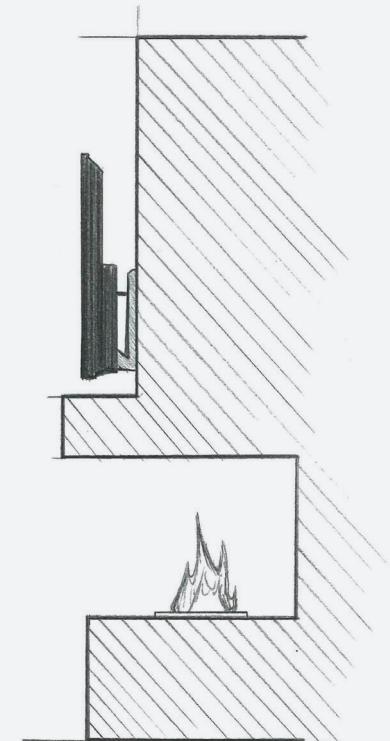

**Solution 1**

The TV needs a non-combustible mantel/ledge to act as a heat shield, or

**Solution 2**

The TV needs to be recessed in a niche, or

**Solution 3**

The TV needs to sit back off the level of the flame.
