

GLASS COVER PLATES ASSEMBLY

Included parts: (Quantity depends on model)

- A. Glass leveller jacks
- B. Glass cover plates

Before you convert your fire pit table into a coffee table

- Ensure burner is off and cool.
- Remove fire screens (if applicable).
- Clear decorative media from the edges of the tray.

Installation Instruction

1. *If your tray has Raised Corner Pockets:* Ensure that the metal corner caps are installed as shown below (Metal corner caps are included with the metal tray).
2. Place the glass leveller jacks (Parts A) on all corners (for square and rectangular trays), and on each side where the glass top will join in the middle to provide sufficient support. Ensure that the glass leveller jacks sit on a flat surface.
3. Gently place the glass cover plates (Parts B) onto the leveller jacks. Check that the glass cover plates sit flat and firm on the leveller jacks, adjust the pin that screws up and down to fine tune the height to support the glass.

Decorative media may need to be adjusted for the glass cover plates to sit flat. Be careful not to scratch the glass.

Note: The glass leveller jacks do not need to be removed when operating your fire.
